

First announcement

The conference

Fifty years of generalized quantifiers

in honour of professor Andrzej Mostowski

will be held in Banach Center, Warsaw (Poland)

25.06.07 – 1.07.07

In 1957 Andrzej Mostowski published his paper introducing the notion of generalized quantifier. Later on wide area of logical researche was opened and many papers devoted to generalized quantifiers were published. The main purpose of the meeting is to summarize current knowledge on this subject.

We are planning to edit a book containing contributed talks. This book would be a new addition to the sequence of books on generalized quantifiers which started with the volume "Model-theoretic logics", edited by Barwise and Feferman in 1985, and continued with the two volume book "Quantifiers, models and computation" edited by M. Krynicki, M. Mostowski and L. Szczerba in 1995, and with "Generalized quantifiers and computation" edited by J.Väänänen in 1999. The new book would give a perspective of 2007 to generalized quantifiers, fifty years after the original article.

The conference will be divided in two parts. First part, from 25.06 to 27.06, will contain four or five tutorials surveying selected topics related to generalized quantifiers. The second part, from 28.06 to 1.07 will contain contributed and invited lectures devoted to recent developments in the subject.

Currently the following logicians confirmed their participation in the meeting: Zosia Adamowicz, John Baldwin, Xavier Caicedo, Ali Enayat, Joerg Flum, Lauri Hella, Juliette Kennedy, Roman Kossak, Michał Krynicki, Kerkko Luosto, Marcin Mostowski, Jouko Väänänen, Andreas Villaveces, Konrad Zdanowski.

Programme Committee: Michał Krynicki (Warsaw), Marcin Mostowski (Warsaw), Jouko Väänänen (Amsterdam and Helsinki) and Konrad Zdanowski (Warsaw).

Local Organizing Committee: Nina Gierasimczuk, Witold Kieraś, Michał Krynicki (chair), Marcin Mostowski, Maria Spsychalska, Jakub Szymanik, Konrad Zdanowski.

Organizing Institutes: Banach Center (Mathematical Institute of Polish Academy of Sciences), and Faculty of Mathematics and Natural Sciences of Cardinal Stefan Wyszyński University in Warsaw.
